

SUMMARY

Computer Science graduate with hands-on experience in full-stack development, machine learning, AI applications, and web technologies. Experienced in developing academic and personal projects involving satellite imagery, machine learning, responsive web development, and AI-driven applications. Strong problem-solving skills with an interest in software development and emerging AI technologies.

EDUCATION

Degree	Institute	Board / University	CGPA / Percentage	Year
B.E. CSE	JCT College of Engineering and Technology, Coimbatore	Anna University	7.60	2022–2026
Senior Secondary	Government Higher Secondary School, Cherpulassery	State Board	88%	2021–2022
Matriculation	T.S.N.M. Higher Secondary School, Kundurkunnu	State Board	97%	2019–2020

EXPERIENCE

- SkyNiche Technologies, KINFRA Integrated Industrial Park, Palakkad

Full-Stack Development Intern

– Worked on full-stack development activities in a professional software development environment.

– Applied practical software development concepts and contributed to development-related tasks.

– Demonstrated strong design skills, self-directed learning, and practical understanding of work requirements.

Jan 2026 – Feb 2026

PROJECTS

- Plot Trust: Forest Encroachment & Land-Use Compliance Detection

Academic Project | AI & Machine Learning

– Developed an AI-based land monitoring system to detect forest encroachment and verify commercial land-use compliance.

– Utilized open-access Landsat satellite imagery as a cost-effective alternative to proprietary datasets.

– Applied machine learning techniques for land-cover classification and designed a lightweight approach suitable for scalable deployment.

– Implemented data ingestion, preprocessing, feature extraction, and classification modules.

– Tools: Python, NumPy, Pandas, Scikit-learn, QGIS
- Semantic Segmentation in Satellite Hyperspectral Imagery by Deep Learning

Final Year Project | Deep Learning

– Developed a deep learning-based approach for semantic segmentation of satellite hyperspectral imagery.
- FitForge – AI-Powered Fitness Application

Personal Project | Ongoing

– Developing an AI-powered fitness application focused on personalized workout and nutrition recommendations.

– Designing personalized fitness planning features based on user goals and preferences.

– Exploring AI-assisted interaction for fitness guidance and recommendation generation.

TECHNICAL SKILLS

- Programming Languages: C, Python

• Web Technologies: HTML, CSS, React

• Libraries: NumPy, Pandas, Scikit-learn

• Tools: VS Code, Git, Excel, QGIS

• Core Skills: Machine Learning, AI, Data Processing, Problem Solving

CERTIFICATIONS

- Legacy Responsive Web Design V8 – freeCodeCamp

Aug 2025

Introduction to MS Excel – Simplilearn SkillUp

Sep 2025

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Participated in hackathons and coding events.

• Member of college clubs and technical forums.

• Volunteered in community and campus activities.

• Held leadership roles in academic and club projects.

LANGUAGES

English Malayalam Tamil Hindi
